## Experience

### First American (India)
Oct 2025 – Present

Senior Software Engineer II · NestJS, Next.js, PostgreSQL, Docker, GPT, Claude, OpenCode

IRIS *Intent Analysis Platform*

Processed **100k+ events/day** via GPT-4.1, reducing user drop-offs by **~18%** and improving task completion by **~20%**.

Designed end-to-end architecture from event ingestion to insight delivery, coordinating across product and data teams.

ONBOARDERR *Intelligent Onboarding System*

Increased feature adoption by **~30%** and cut onboarding time by **~25%** through context-aware GPT-4.1 guidance flows.

Owned full delivery from concept to production, aligning stakeholders across platform, design, and engineering.

BLOCKPARTY *Design System*

Shipped accessible, locale-aware Date Picker reducing frontend dev effort by **~15%** across 6+ product surfaces.

Drove design system adoption across 3 engineering pods, collaborating closely with product designers.

### Nykaa E-retail Pvt Ltd
Nov 2021 – Sept 2025

Software Development Engineer III · Node.js, React, TypeScript, Express, AWS

SELLER PORTAL *Vendor Operations Platform*

Automated financial validation protecting **₹51 Cr** in revenue; streamlined warehouse ops cutting manual effort by **56%**.

Managed cross-functional delivery across seller ops, catalogue, and invoicing systems spanning multiple engineering teams.

NYKAA FASHION *Consumer Web*

Redesigned discovery/search — boosted engagement **23%**, improved Core Web Vitals by **15 points**, cut CI/CD costs by **12%**.

Coordinated with design and analytics teams to ship Mixpanel + GTM instrumentation enabling data-driven iteration.

NOTIFICATION SERVICE A2S *Infra & Auth*

Built event-driven push/email/in-app service (WebSockets, Firebase) and zero-trust auth framework (Express, Redis) for session management at scale.

Defined auth and notification contracts adopted across 5+ Nykaa product teams; mentored 2 junior engineers through delivery.

### Guardian India · Guardian Anytime
Aug 2020 – Nov 2021

Engineer II · Node.js, React, Webpack 5, GraphQL

GA-CLAIMS *Claims Management*

Migrated to **Webpack 5 micro-frontend** — cut deploy time by **24 min**, reduced error rates by **15%**, raised NPS by **23%**.

GA-AUTH · GA-MEMBERS KICKSTARTER

Built GraphQL schema stitching across GA-Auth, GA-Claims, GA-Members; CI/CD portal cut service setup time by **30%**.

### Lucideus Tech (now Safe Security)
Feb 2020 – Aug 2020

Software Development Engineer · Node.js, TypeScript, AWS CDK

SAFEX *Serverless Security Platform*

→ Built serverless platform (Lambda, DynamoDB, API Gateway) — slashed infra costs by **43%**, improved reliability by **13%**.

## Profile

Full-stack JavaScript engineer with 8 years delivering scalable platforms at product companies. Currently building GenAI systems. Strong in React/Node architecture, CI/CD, and cross-functional delivery.

## Key Impact

| | |
|---|---|
| **₹51Cr** revenue protected | **56%** ops effort saved |
| **100k+** events/day | **43%** infra cost cut |

## Skills

FRONTEND
React · Next.js · TypeScript · Webpack

BACKEND
Node.js · NestJS · Express · GraphQL

CLOUD & INFRA
AWS · Azure · Docker · Lambda

AI / GENAI
Claude · OpenCode · GPT-4.1 · MCP · Agentic

DATA
PostgreSQL · Redis · MongoDB

## Education

**Maharaja Surajmal Institute of Technology**
B.Tech, Information Technology
2013 – 2017 · 76%
